Fluids, Electrolytes and Acid-Base Balance Todd A. Nickloes, DO, FACOS Assistant Professor of Surgery
Department of Surgery Division of Trauma/Critical Care

Fluids, Electrolytes and Acid-Base Balance

Acid-base homeostasis is the homeostatic regulation of the pH of the body's extracellular fluid (ECF). The proper balance between the acids and bases (i.e. the pH) in the ECF is crucial for the normal physiology of the body, and cellular metabolism. The pH of the intracellular fluid and the extracellular fluid need to be maintained at a constant level.. Many extracellular proteins such as ...

Acid-base homeostasis - Wikipedia

This book has finally settled all my doubts concerning the fluid balance, electrolyte disorders and acid base equilibrium. The book explains a complicated and commonly misunderstood subject of the medical field in a simple cohesive manner, going from the most basic-college stuff and leading you through the clinical presentation, diagnosis and treatment.

The Fluid, Electrolyte And Acid-base Companion

A conjugate acid, within the Brønsted-Lowry acid-base theory, is a species formed by the reception of a proton (H⁺) by a base—in other words, it is a base with a hydrogen ion added to it. On the other hand, a conjugate base is what is left over after an acid has donated a proton during a chemical reaction. Hence, a conjugate base is a species formed by the removal of a proton from an acid.

Review Article from The New England Journal of Medicine "Physiological Approach to Assessment of Acid-Base Disturbances

Physiological Approach to Assessment of Acid-Base

Electrolytes are minerals that are found in body tissues and blood in the form of dissolved salts. As electrically charged particles, electrolytes help move nutrients into and wastes out of the body's cells, maintain a healthy water balance, and help stabilize the body's acid/base level. The electrolyte panel measures the blood levels of the main electrolytes in the body: sodium (Na⁺ ...
