Stage 3B non-small cell lung cancer is considered advanced lung cancer along with stage 4, and though it is not usually curable, it is treatable. About 20 percent of people have stage 3B lung cancer at the time of diagnosis, with another 40 percent of individuals having already progressed to stage 4.

One of the most common anxiety disorders seen in general medical practice and in the general population is generalized anxiety disorder (GAD). The disorder has an estimated current prevalence in general medical practice of 2.8% to 8.5% 1-3 and in the general population of 1.6% to 5.0%. 4-6 Whereas depression in clinical settings has generated substantial research, there have been far fewer ...

A Brief Measure for Assessing Generalized Anxiety Disorder

Gastric cancer is the third most common cause of cancer-related death in the world, and it remains difficult to cure in Western countries, primarily because most patients present with advanced disease. In the United States, stomach malignancy is currently the 15th most common cancer.

Planets in astrology have a meaning different from the modern astronomical understanding of what a planet is. Before the age of telescopes, the night sky was thought to consist of two very similar components: fixed stars, which remained motionless in relation to each other, and "wandering stars" (Ancient Greek: ἀστὲρες πλανηταί, *ásteres planetai*), which moved relative to the ...
