American Journal of Physics and Applications (AJPA) provides a forum for the publication of scientific research and review articles. The journal publishes original research papers devoted to wide range of areas of physics and its applications. The topics included in this journal emphasize understanding of the physics underlying modern technology.

Background. Metal-organic frameworks (MOFs) are made by linking inorganic and organic units by strong bonds (reticular synthesis). The flexibility with which the constituents' geometry, size, and functionality can be varied has led to more than 20,000 different MOFs being reported and studied within the past decade.

Finite Fields and Their Applications is a peer-reviewed technical journal publishing papers in finite field theory as well as in applications of finite fields. As a result of applications in a wide variety of areas, finite fields are increasingly important in several areas of mathematics, including linear and abstract algebra, number theory and algebraic geometry, as well as in computer science ...

Arsine (IUPAC name: arsane) is an inorganic compound with the formula AsH₃. This flammable, pyrophoric, and highly toxic pnictogen hydride gas is one of the simplest compounds of arsenic. Despite its lethality, it finds some applications in the semiconductor industry and for the synthesis of organoarsenic compounds. The term arsine is commonly used to describe a class of organoarsenic ...

Text mining, also referred to as text data mining, roughly equivalent to text analytics, is the process of deriving high-quality information from text. High-quality information is typically derived through the devising of patterns and trends through means such as statistical pattern learning. Text mining usually involves the process of structuring the input text (usually parsing, along with the ...
