

automated accounting systems and pdf

Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.

accounting. accounting is tracking the flow of valuable commodities, such as money or time. It clarifies activity, priorities, obligations, opportunities. It can reduce stress and even be enjoyable.. double-entry bookkeeping is a process for doing this reliably. For every movement of value (a transaction), both the source and destination are recorded.Simple arithmetic invariants help prevent ...
