BASICS OF HEAT TRANSFER While teaching heat transfer, one of the first questions students commonly ask is the difference between heat and temperature. Another common question concerns the difference between the subjects of heat transfer and the thermodynamics.

BASICS OF HEAT TRANSFER - NPTEL

For one-dimensional heat conduction (temperature depending on one variable only), we can devise a basic description of the process. The first law in control volume form (steady flow energy equation) with no shaft work and no mass flow reduces to the statement that \dot{Q} for all surfaces = 0 (no heat transfer on top or
