**Chapter 54: Community Ecology - Biology Junction**

Compared to other threats to biodiversity, invasive introduced species rank second only to habitat destruction, such as forest clearing. Of all 1,880 imperiled species in the United States, 49% are endangered because of introduced species alone or because of their impact combined with other forces.

**Adaptive Management - FOS Online**

A biodiversity action plan (BAP) is an internationally recognized program addressing threatened species and habitats and is designed to protect and restore biological systems. The original impetus for these plans derives from the 1992 Convention on Biological Diversity (CBD). As of 2009, 191 countries have ratified the CBD, but only a fraction of these have developed substantive BAP documents.

### **Senior Biology - 'Deadly' Extended Experimental Investigations**

Since there is no unequivocal definition of life, most current definitions in biology are descriptive. Life is considered a characteristic of something that preserves, furthers or reinforces its existence in the given environment.

### **Life - Wikipedia**

A major theme of biology is the great biodiversity of life. Overgeneralizations inaccurately minimize biodiversity. Teaching publications sometimes state that all plants are photosynthetic.
