Biomedical Engineering (BME) or Medical Engineering is the application of engineering principles and design concepts to medicine and biology for healthcare purposes (e.g. diagnostic or therapeutic). This field seeks to close the gap between engineering and medicine, combining the design and problem solving skills of engineering with medical biological sciences to advance health care treatment ...

About Parks College. It might be the satellite we launch that leads to more efficient spacecraft, the robotic device we develop that makes surgery less invasive, the infrastructure we design to provide clean water or the next-generation of pilots we educate to lead the future of aviation.
