CV12 Chap 2 Solns - PBworks

1 Vectors in Euclidean Space 1.1 Introduction In single-variable calculus, the functions that one encounters are functions of a variable (usually x or t) that varies over some subset of the real number line (which we

denote by R). For such a function, say, $y=f(x)$, the graph of the function f consists of the points $(x,y)= (x,f(x))$. These points lie in the Euclidean plane, which, in the Cartesian ...
