Power engineering, also called power systems engineering, is a subfield of electrical engineering that deals with the generation, transmission, distribution and utilization of electric power, and the electrical apparatus connected to such systems. Although much of the field is concerned with the problems of three-phase AC power – the standard for large-scale power transmission and ...

FeelinSublime87: Basically, the difference between an AC and DC magnetic field are that a DC magnetic field emanates from the earth naturally that is what allows a compass to find magnetic North; while AC magnetic fields emanate from man made electrical systems (power lines, transformers, computers, and anything with an electric motor).
