DDR3 prices are already ridiculously low, I have a hard time imagining them going any lower when many DRAM manufacturers are either barely breaking even or recording losses.

Is 8GB's of RAM good enough for now, or should I go 16GB's?

What are the principles of compliance that underpin the motivation for advertisements subliminally hiding sex and death symbols? How is each of us influenced in our decision making process by short cutting the rational thinking mind? This article will examine perceptual defense mechanisms, strategies of compliance, and mechanistic means to produce controlled responses.
