FOR610 teaches how to perform interactive behavioral analysis of malware, deobfuscate samples, circumvent anti-analysis capabilities, and review key aspects of malicious code for a deeper understanding of its functionality.

Reverse Engineering Malware Training | Malware Tools

Computer and network surveillance is the monitoring of computer activity and data stored on a hard drive, or data being transferred over computer networks such as the Internet. The monitoring is often carried out covertly and may be completed by governments, corporations, criminal organizations, or individuals.

Computer and network surveillance - Wikipedia

The AES E-Library contains thousands of fully searchable PDF files documenting the progression of audio research from 1953 to the present day. The E-library includes every AES paper published at a convention, conference or in the Journal.
