Can researchers determine the color of a 200-million-year-old insect? Scientists from China, Germany and the U.K. have new evidence that reveals the true color of fossil insects. The research was ...

### **200-million-year-old insect color revealed by fossil scales**

Food allergy to insects was described for different insect species. • De novo sensitization (primary allergy) to insects does exist. • Sensitization to edible insects can take place via inhalation.

### **Insect (food) allergy and allergens - ScienceDirect**

In some circles, however, opposition to the concept of evolution has persisted to the present. The argument from design has recently been revived by a number of academics with scientific credentials, who maintain that their version of the idea (unlike Paley's) is soundly supported by both microbiology and mathematics.
