Uranus, the seventh planet of the Solar System, has 27 known moons, all of which are named after characters from the works of William Shakespeare and Alexander Pope. Uranus's moons are divided into three groups: thirteen inner moons, five major moons, and nine irregular moons. The inner moons are small dark bodies that share common properties and origins with Uranus's rings.

In times of deep distress I've often found the brutal, unsparring candor of Friedrich Nietzsche a strange comfort. While wholly enamored of the aristocratic, Hellenistic past of literary invention, the often bilious German philosopher nonetheless had no illusions about the nature of power, which does as it will and is not held in check by what we take for common values.
