Chemical Reaction Engineering Solutions Manual - Octave

GNU Octave is software featuring a high-level programming language, primarily intended for numerical computations. Octave helps in solving linear and nonlinear problems numerically, and for performing other numerical experiments using a language that is mostly compatible with MATLAB. It may also be used as a batch-oriented language. Since it is part of the GNU Project, it is free software under ...

In physical and organic chemistry, the dispersity is a measure of the heterogeneity of sizes of molecules or particles in a mixture. A collection of objects is called uniform if the objects have the same size, shape, or mass. A sample of objects that have an inconsistent size, shape and mass distribution is called non-uniform. The objects can be in any form of chemical dispersion, such as ...

Dispersity - Wikipedia

Le taux de conversion représente la fraction d'un réactif qui réagit lors d'une réaction chimique. Mathématiquement, le taux de conversion X pour un réactif i s'exprime pour un système fermé selon la formule suivante : $X_i = \frac{n_i^0 - n_i}{n_i^0}$, où n_i^0 est la quantité de matière (n). Les indices 0 et t représentent respectivement l'état initial et un temps ultérieur donné.

Classificazione dei reattori chimici Reattori continui e discontinui. I processi chimici e quindi i reattori sono divisibili in due famiglie: Processi continui: ogni unità che compone l'impianto chimico, quindi anche il reattore (che può essere di tipo CSTR, PFR o PBR), opera 24 ore al giorno, 7 giorni su 7, a condizioni praticamente sempre costanti.
