In response to those who complained in my recent post that linear trends are not a good way to compare the models to observations (even though the modelers have claimed that it's the long-term behavior of the models we should focus on, not individual years), here are running 5-year averages for ...

A diacritic " also diacritical mark, diacritical point, diacritical sign, or accent " is a glyph added to a letter, or basic glyph. The term derives from the Ancient Greek διακριτικός, (diakritikós, "distinguishing"), from διακρίνω (diakrínō, "to distinguish"). of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

Here are a few interesting recent papers I've read over the past few months. Bear in mind that Shane Legg, co-founder and chief scientist of Deep Mind, said publicly a few years ago that there's a 50% probability that we will achieve human level AI by 2028 and a 90% probability by 2050.

In a 1970 NASA Technical Note Infinite Periodic Minimal Surfaces Without Self-Intersections (p.38 ff), I described how skeletal graphs can be used to represent TPMS. More recently David Hoffman and Jim Hoffman (no relation) have demonstrated in their Scientific Graphics Project that for the TPMS P, G, D, and also for a fourth surface (I-WP) of genus 4, there is a striking connection between ...
