The idea of self-replicating spacecraft has been applied “ in theory “ to several distinct "tasks". The particular variant of this idea applied to the idea of space exploration is known as a von Neumann probe, after being conceived by mathematician John von Neumann. Other variants include the Berserker and an automated terraforming seeder ship.

It’s known as the winner’s curse. When companies merge, most of the shareholder value created is likely to go not to the buyer but to the seller. Indeed, on average, the buyer pays the seller all of the value generated by a merger, in the form of a premium of from 10 to 35 percent of the target ...
