

variational methods in economics pdf

Mathematical economics is the application of mathematical methods to represent theories and analyze problems in economics. By convention, these applied methods are beyond simple geometry, such as differential and integral calculus, difference and differential equations, matrix algebra, mathematical programming, and other computational methods. ...

Honors. Criteria used by the School of Physical Sciences in selecting candidates for honors at graduation are as follows: Approximately 2 percent will be awarded summa cum laude, 4 percent magna cum laude, and 10 percent cum laude. Honors are awarded on the basis of a student's performance in research, cumulative grade point average, and performance in upper-division courses in the major.
